

## F-LON® 6000 - Case study

### Product

Rubber mould

### Industry

[Automotive Industry](#)

### Challenge

The client requested a coating suitable for releasing rubber components from injection moulding tools to ensure easy clean releasing of the components to avoid messy spray release products being used which slows down production and adds to the clean down costs.

### Solution

We provided F-LON® 6000 non-stick release coating to all working areas of the mould faces eliminating the need to apply silicone spray as above. Ensuring uninterrupted production runs and reducing costs.
