

PRODUCT DATA SHEET F-LON® 6060 Series

F-LON® 6060 is the best fluoropolymer **Non-Stick** coating with excellent anti-corrosion properties.

F-LON® 6060 is a coating offering durability and performance in a two layer coating system, widely used in the food industry and on Industrial Bakeware.

F-LON® 6060 Series

Recommended Dry Film Thickness	30-50
Substrates	Most metallic substrate.
Pre-treatment	Light gritblast
Application method	Hand spray or automatic spray line.
Curing schedule	360°C
Operating Temperature	205°C
Colours available	Black, Green & Brown
Typical applications	Bakeware process equipment, heat seal platens and light chemical resistant applications.
Other properties	Abrasion resistance FDA compliant Low coefficient of Friction Weather Resistance Exceptional Dielectric Properties Non-Wetting Characteristics Chemical resistance
